

PORTABLE GAS MONITORS FOR THE MARINE INDUSTRY

RIKEN KEIKI's portable gas monitors have been certified to the latest version of the MED implementing regulations. Riken Keiki is one of the only gas detection manufacturers whose range of marine instruments are certified to the very latest version of MED regulation.

One GX-8000 can handle a wide variety of operations required by the ship classification rules. Powerful pump enables fast measurement and improved work efficiency. The world's smallest and lightest wearable monitor GX-2009 is also available to ensure safe work after entry.

SECURING SAFETY WHEN ENTERING ENCLOSED SPACES

Detecting HC / O₂ / CO / H₂S prior to entering a number of enclosed compartments such as cargo tanks, water ballast tanks and other hold spaces (in full compliance with the SOLAS XI-1/7 regulation).
