

GMI **Gasurveyor 700**

Natural Gas & Hydrogen detection
in one instrument

- ✓ Natural gas
- ✓ Hydrogen blends
- ✓ 100% Hydrogen

ATEX Certified

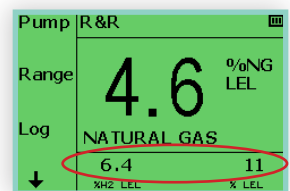

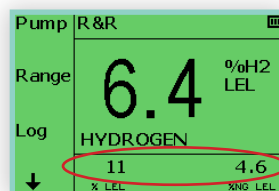

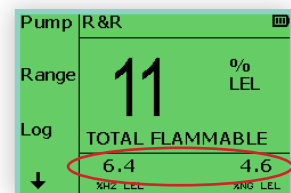

PPM, LEL and Volume capability
H₂ - Combined or individual LEL readings

An instrument configured to meet your hydrogen needs

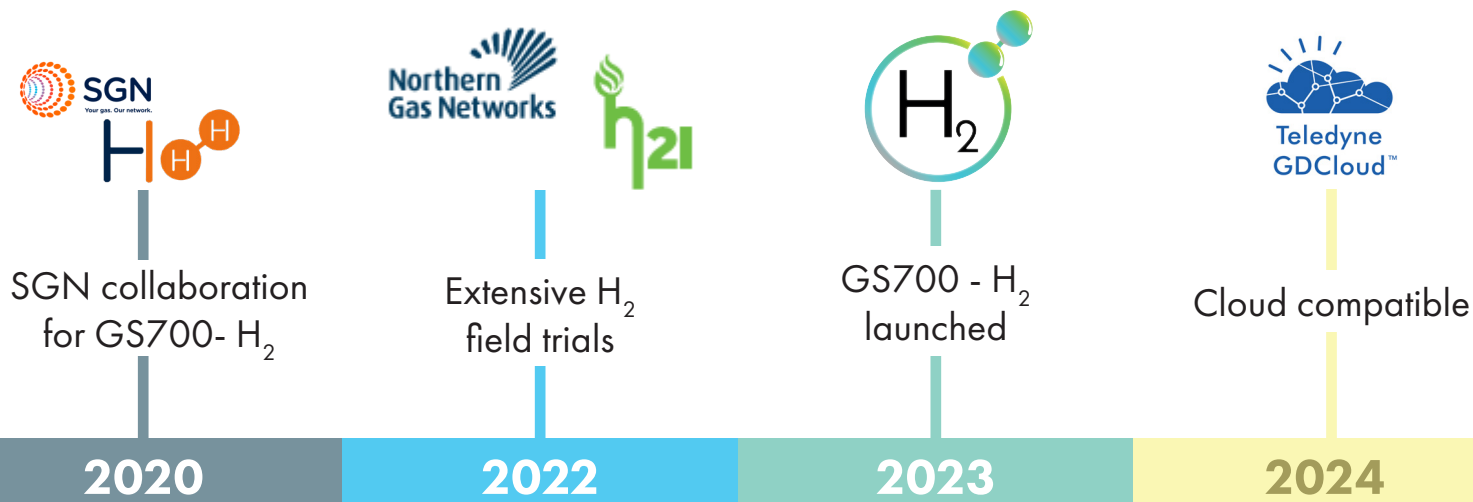

User-friendly display options

- LEL, PPM & Volume Gas
- 360° Alarms
- Easily view combined or individual LEL readings at the touch of a button

Fully configurable user interface to support all gas utility hydrogen applications

Hydrogen Journey

Datalogging capability

Intelligent datalogging with optional GPS. Facilitates data gathering, including field usage reports, calibration history, leak investigation mapping; making it easy to demonstrate compliance.

Application ready

Highly configurable for your gas detection needs, providing flexibility and performance.

Application modes include:

- Gas Leak Outdoors
- Purge
- Search
- Barhole
- Confined Space
- Pipeline Gas Test

You focus on your Hydrogen Transition.
We focus on your safety. *How can we help you?*
